

Application Serial No. 10/602,957
Reply to Office Action of September 22, 2004

PATENT
Docket: CU-3270

REMARKS/ARGUMENTS

Reconsideration is respectfully requested.

Claims 1-11 are pending in the present application before this amendment.

By the present amendment, Claim 2 has been cancelled without prejudice, and
Claim 6 has been amended. No new matter has been added.

Claim 6 has been amended as suggested by the Examiner, and withdrawal of
the objection is respectfully requested.

Claims 2-4 and 6 are indicated as being allowable if they are rewritten in
independent form including all limitations of the base claim and any intervening
claims.

In response, Claim 1 has been amended to basically incorporate the
limitations of Claim 2 reciting the hole being rectangular as well as being a square.

Applicants agree with the Office Action page 6 that Kim '636 and Song do not
teach a rectangular hole as claimed in Claim 2, but asserts further none of the cited
references teach the hole being a square, either. In this regard, Claim 1 has been
amended to recite --a rectangular or square hole -- in order not to unnecessarily
narrow the scope of the hole.

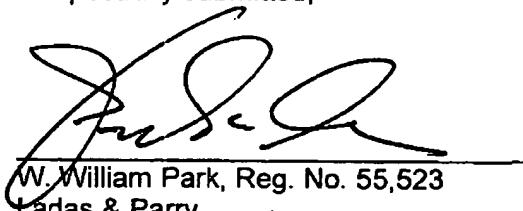

For the reasons set forth above, Applicants respectfully submit that Claims 1
and 3-11 pending in this application are in condition for allowance over the cited
references. This amendment is considered to be responsive to all points raised in
the Office Action. Accordingly, Applicants respectfully request reconsideration and
withdrawal of the outstanding rejections and earnestly solicit an indication of
allowable subject matter.
